### 302 Engine With Points Wiring

Early 302 engines use a distributor with a point and condenser setup. In this type of distributor the coil is triggered by the opening of the points, which ride on an eight-sided cam mounted on the distributor shaft. This causes the coil to discharge and send the spark, also known as secondary voltage, through the center of the distributor cap to the rotor.

Wiring for a Ford 302 Alternator. by John Stevens J.D. Wiring the alternator for Ford's 302-cubic-inch engine is a fairly simple task, particularly when compared to the alternators used on other engine designs, perhaps because the 302 was created in the 1960s and did not require much wiring to begin with. A number of posts on the back of the alternator are used to attach each wire to the alternator, and all of the wires used by the alternator are colored-coded.
