Details & Specifications. This 4 inch anti-vortex plate prevents the formation of a vortex and subsequently air entrapment into the pump by forcing any emerging vortex to go around a plate and then into the suction pipe. The swirling motion cannot be maintained and the vortex dissipates and cannot form if the path is too long and contorted.

The Anti-Vortex Plate is manufactured from stainless steel type 304 and is adjustable. It prevents water vortexing on the suction and discharge side of a fountain system by slowing down the velocity and angles of water to allow for a manageable and adjustable flow. Anti-Vortex Plates are also important, as they protect your pump impeller.
