Difference algebra - Wikipedia

algebra trigonometry statistics calculus matrices variables list. Square Root. In mathematics, a square root of a number x is a number y such that $y^2 = x$; in other words, a number y whose square (the result of multiplying the number by itself, or $y \cdot y$) is x . For example, 4 and -4 are square roots of 16, because $4^2 = (-4)^2 = 16$.
