currently no specific data on COVID-19 transmission while performing CPR or giving first aid, it is reasonable to conclude that chest compressions have the potential to generate respiratory droplets or aerosols and close contact needed for some aspects of first aid may have risk of transmission.

First Aid/CPR/AED Care During COVID-19 | Red Cross

Get CPR/AED certified – and learn how to help when it's needed most. As part of our mission to train people how to respond to and prepare for emergencies, we offer CPR/AED certification classes that can help you save a life when every moment counts. You may not realize it, but the response time for first responders after 911 is called averages 8-12 minutes, and during sudden cardiac arrest – each minute that defibrillation is delayed reduces someone's chances of survival by approximately ...
