During the 1940s, Ford Motor Company copied all of their parts drawings onto microfiche and destroyed the blueprints. It is understood that this had been done for storage purposes, because microfilm takes up less physical space and has a longer lifespan than paper, and also as a guard against espionage during wartime production ...

EcoBoost is a series of turbocharged, direct-injection gasoline engines produced by Ford and originally co-developed by FEV Inc. EcoBoost engines are designed to deliver power and torque consistent with those of larger-displacement (cylinder volume), naturally aspirated engines, while achieving about 30% better fuel efficiency and 15% fewer greenhouse emissions, according to Ford.
