GE's CR115E geared rotary limit switch provides limit control on rotating-drive equipment. This worm and gear-reduction limit switch may be used in conjunction with motors to open and close overhead doors, to operate cable on cranes and hoists, limit the number of turns on thread-tapping equipment, and on other machine tool applications that require rotating-drive shaft control. GE Switches are provided in NEMA Type 1, 4, 7, and 9 enclosures for adapting to specific environmental conditions.
