If you already know what you are looking for, search the database by author name, title, language, or subjects. You can also check out the top 100 list to see what other people have been downloading.

I Blame The Hormones A

A journey through female depression. I blame the hormones is a memoir of my experience with hormonal depression. Once I had started to write the book I decided to concentrate on my history and the beginnings of my illness. It begins with my sudden change in personality and the slow realisation that I wasn't the same as my peers. As the years went by, I became more despondent and suffered from low self-esteem and would often feel very alone and intensely sad.

I blame the hormones - Posts | Facebook

My worst episodes of mood swings were almost always after a drinking session, and anxiety is known to increase ten-fold with the dreaded hangover. As our alcohol consumption increases, the level of nutrients in our system is compromised and our hormones and stress levels cannot cope as efficiently either.

I blame the hormones: February 2016

Morning everybody. I have had lots and lots of response to my website with lots of people asking me questions about this type of depression. When I first started researching the condition I discovered that this illness falls into 3 categories, all following a distinct pattern with very concise symptoms. Ill try to explain it best I can so that you can seek help if you need to.

I blame the hormones: February 2014

Blame it on the hormones Every craving, "mommy brain" moment, unsteady wobble, mountaintop high and abysmal low can be traced back to a gang of microscopic culprits—your hormones. With the exception of producing a few hormones unique to pregnancy, your body shifts into mama-mode by increasing the levels of hormones already present in your system.

Blame it on the hormones - Pregnancy & Newborn Magazine

The reason to point this out is that, as Joe Allen aptly called it, hormones are used as an excuse. Blaming it on their raging hormones means not having to look into their lives for legitimate...

Amazon.com: Customer reviews: I Blame The Hormones: A raw ...

Blame it on the hormones. Sweating - Another effect of hormones that is less than desirable is sweating. Hormonal fluctuations during pregnancy and also during menopause can turn your body into a hot flashing, sweat machine. Food Cravings - Fluctuating hormones are also responsible for intense cravings, especially during pregnancy and PMS.
