A machinist can be a good toolmaker, while a toolmaker could never be made into a good machinist. Just a little good-natured ribbing really. I expect a toolmaker to be able to use any machine in the shop and be able to make jigs, fixtures and tooling for production. He must have the ability to turn a concept into reality.

### Difference Between Toolmaker & Machinist?

On glassdor and open positions, that is what they offer. 110k\$ - 200k\$ and engineers at 200k\$, starting. As I said, 200k is a high salary. With 100k-300k stock options to vest in 3-5 years, on top.
