Explore forces, energy and work as you push household objects up and down a ramp. Lower and raise the ramp to see how the angle of inclination affects the parallel forces acting on the file cabinet. Graphs show forces, energy and work.

Now, slowly increase the ramp angle until you reach an angle when the small crate is about to move. Angle = 22 degree e. Keeping the same angle, what minimum applied force do you need to move the crate up the inclined plane?

This document directs them to PhET where they will be using the ramp simulation. My activity sheet is also meant to direct the students in their learning so that they are confident in what material needs to be understood. However, the answers to the questions, data tables, and graphs need to be completed on a separate sheet of paper.
