Science For The People A

Science for the People is an organization dedicated to building a social movement around progressive and radical perspectives on science and society. We are STEM workers, educators, and activists who believe that science can be a positive force for humanity and the planet. Join our listserv or Slack and get involved today!

Science for the People

Science for the People is a left-wing socialist organization that emerged from the antiwar culture of the United States in the late 1960s. Since 2014 it has experienced a revival focusing primarily on the dual nature of science. The organization advocates for a scientific establishment that is not isolated from society, rather one that uses scientific discoveries to advocate for and advance social justice and critically approach science as a social endeavor.

Science for the People - Wikipedia

Science for the People is 100% listener supported. Help us keep the show going (and ad-free), and access bonus content and monthly live video hangouts! I Want To Help, Tell Me More! Recent Episodes. Programming Announcement: Slowing Down for a Bit.

Science For The People: Science Radio Show & Podcast

Science for the People (SftP), the most important radical science movement in U.S. history, arose in 1969 out of the anti-war movement and lasted until 1989.

Science for the People: the 1970s and Today

This week on Science for the People, we're diving into the world of DNA barcoding. We speak with Mehrdad Hajibabaei, Associate Professor in the Department of Integrative Biology and the Centre for Biodiversity Genomics at the University of Guelph, about the International Barcode of Life.

Episodes: Science for the People

Science for the People originally arose in 1969 out of the anti-war movement and lasted until 1989. With radical analysis and non-hierarchical governing structure, Science for the People tackled the militarization of scientific research, the corporate control of research agendas, the political implications of sociobiology and other scientific theories, the environmental consequences of energy policy, inequalities in health care, and many other issues.

About SftP - Science for the People

Mission. Boston Science for the People seeks to: raise awareness of the political nature of science and technology; expose and critique the ways science and technology are controlled by the wealthy and used for private gain and domination rather than to address human needs; bring scientific knowledge and solidarity to collaborations with progressive community organizations and like-minded groups;

Mission - Boston Chapter Science for the People

Science for the People is a long-format interview podcast that explores the connections between science, popular culture, history, and public policy, to help listeners understand the evidence and arguments behind what's in the news and on the shelves. Every week, our hosts sit down with science researchers, writers, authors, journalists, and experts to discuss science from the past, the science that affects our lives today, and how science might change our future.

About Science for the People

Science for the People is dedicated to building and promoting social movements and political struggles around progressive and radical perspectives on science and society. We are workers, educators, and students in science and technology-related fields committed to the democratic practice of science for the benefit of humanity and the planet.
