Power Plant Maintenance Selection System Secrets Study ...

Air density determines the mass of air that is used by a jet engine. The factors that affect density are the temperature and pressure of the air. If density increases, thrust increases and vice versa. An increase in air temperature entering an engine will cause a decrease in density and thrust. With a given throttle setting, engine thrust will vary if the temperature or pressure of the air entering the engine changes.

this Study Guide for my son. He needed to prepare for the Power Plant Maintenance Test for his employer-a nuclear power plant. Because of the way the guide is written and presented he is confident he is going to pass the national nuclear power plant test.

Power Plant Maintenance Positions Selection System (MASS)

Power plants help keep the lights on by producing the energy we need. Of course, the plants don't run on their own. They need to be maintained, and it takes special skills to keep these important plants safely running. The Edison Electric Institute makes the Power Plant Maintenance Selection System exam available to utilities who want to use it to test potential employees seeking positions in electric utility power generation maintenance.

Power Plant Maintenance Selection ... - Study Guide Zone

The first step is to simplify the circuitry by calculating intermediate values (total resistance) when possible ($R_1 = 2$, $R_2 = 3.5$, $R_3 = 3.5$, $R_4 = 5$, $R_5 = 5$, $R_6 = 15$, $R_7 = 15$): Add $R_2 + R_3 = 3.5 + 3.5 = 7$. Next, calculate the total resistance for the circuits connected in parallel with R_2 and R_3 :
